INDEX TO VOLUME 3

INDEX OF AUTHORS

B

BALDWIN, Ernest: Anthelminthic potency and chemical constitution, 91
BARLOW, R. B., and Ing, H. R.: Polymethylene bisonium salts, 298
BEDFORD, T. H. B.: Injected solutions and cell content of C.S.F., 80
BEIN, H. J.: Potassium and calcium ions and procaine, 251
BLASCHKO, H., Holton, P., and Sloane Stanley, G. H.: Noradrenaline carboxylic acid, 315
BROWNLEE, G., Green, A. F., and Woodbine, M.: Pharmacology of sulphetrone, 15
BROWNLEE, G., and Kennedy, C. R.: Sulphetrone in experimental tuberculosis, 29
BROWNLEE, G., and Kennedy, C. R.: Sulphetrone, streptomycin, and promin in experimental tuberculosis, 37
BROWNLEE, G., and Woodbine, M.: Compounds related to penicillin, 305
BURGEN, A. S. V., and Keele, C. A.: Procaine metabolism in the cat, 128
BURN, J. H., and Dutta, N. K.: Vascular effects of acetylcholine antagonists, 354
BURN, J. H., and Vane, J. R.: Paludrine and gastric secretion, 346

C

CHANG, I., Huang, Y.-T., and Yieh, Y.-W.: Phenylthiourethanes as local anaesthetics, 297
CHOU, T. C., and Elío, F. J. de: Anticurare activity of eserine, 113
CULLUMBINE, H.: Sodium salt solutions in shock, 72

D

DAVIES, O. L., and Hurst, E. Weston: Blood-brain barrier and dosage, 309
DEL POZO, E. C.: Action of scorpion venom on cholinesterase, 219
DOLL, R., and Schneider, R.: Paludrine and gastric secretion, 352
DUTTA, N. K.: Acetylcholine antagonists and body temperature, 246
DUTTA, N. K., and Burn, J. H.: Vascular effects of acetylcholine antagonists, 354
DUTTA, N. K., and Stephenson, R. P.: Irritant action of conessine and its isomers, 326

E

ELÍO, F. J. de.: Acetylcholine antagonists, 108
ELÍO, F. J. de, and Chou, T. C.: Anticurare activity of eserine, 113
EMMELIN, N., and Feldberg, W.: Systemic effects of ATP, 273

F

FASTIER, F. N.: Properties of amidine derivatives, I, 198
FASTIER, F. N., and Reid, C. S. W.: Properties of amidine derivatives, II, 205
FELDBERG, W., and Emmelin, N.: Systemic effects of ATP, 273
FOSS, G. L.: Methyl fluoroacetate, 118
FREEMAN, W. A., Wien, R., and Harrison, J.: Antibacterial diamidines, 211
FRIEDMANN, E., Marrian, D. H., and Simon-Reuss, I.: Antimitotic action of quinones, 263
FRIEDMANN, E., Marrian, D. H., and Simon-Reuss, I.: Sulphydryl addition compounds in mitosis, 335
FULTON, J. D.: Photostilbamidine, 75

G

GINSBURG, M., and Weatherall, M.: Lead acetate and BAL, 223
GOODSON, J. A., Goodwin, L. G., Gorvin, J. H., Goss, M. D., Kirby, K. S., Lock, J. A., Neal, R. A., Sharp, T. M., and Solomon, W.: Chemotherapy of amoebiasis, II and III, 49, 62
GOODWIN, L. G., Gorvin, J. H., Goss, M. D., Kirby, K. S., Lock, J. A., Neal, R. A., Sharp, T. M., Solomon, W., and Goodson, J. A.: Chemotherapy of amoebiasis, II and III, 49, 62
GOODWIN, L. G., Hoare, C. A., and Sharp, T. M.: Chemotherapy of amoebiasis, I, 44
GORVIN, J. H., Goss, M. D., Kirby, K. S., Lock, J. A., Neal, R. A., Sharp, T. M., Solomon, W., Goodson, J. A., and Goodwin, L. G.: Chemotherapy of amoebiasis, II and III, 49, 62
GOSS, M. D., Kirby, K. S., Lock, J. A., Neal, R. A., Sharp, T. M., Solomon, W., Goodson, J. A., Goodwin, L. G., and Gorvin, J. H.: Chemotherapy of amoebiasis, II and III, 49, 62
GOWDEY, C. W.: Priscol and N-methylpriscol, 254
GRAHAM, J. D. P., and Hood, J.: Actions of BAL, 84
GREEN, A. F., Brownlee, G., and Woodbine, M.: Pharmacology of sulphetrone, 15

SUBJECT INDEX

A

Acetylcholine antagonists,
  action on body temperature, 246
  action on vessels of rabbit's ear, 254
  comparison of their actions, 108
Adenosine triphosphate, systemic effects of, 273
Adrenaline, noradrenaline, and liver sympathin, 189
Adrenaline, potentiation of vasoconstrictor action by amidine derivatives, 205
Amidine derivatives, circulatory properties of, 198, 205
Amoebiasis,
  biological assay of chemotherapeutic agents, 44
  chemotherapy of
    amines formally derived from emetine, 49
    variants of bis-(diamylamino)decane, 62
Anthelminthic potency and chemical constitution, 91
Antibacterial activity of synthetic compounds related to penicillin, 305
Antibacterial diamidines, 211
Anticurare activity of eserine, 113
Antimalarial agents (*see also* Paludrine),
  effect on glucose metabolism of *P. gallinaceum*, 1
  in chemotherapy of experimental tuberculosis, 156
Antimitotic action of
  certain quinones, 263
  sulphydryl addition compounds of quinones, 335

B

BAL,
  actions of, 84
  effect of environmental temperature on toxicity of, 116
  effect on distribution of lead acetate in rabbits, 223
  in acute lead acetate poisoning, 137
Bis-(diamylamino)decane, variants of, in amoebiasis, 62
Bis-quaternary ammonium salts, curare-like action of, 298
Blood-brain barrier, studies on, 309
Body temperature, effect of acetylcholine antagonists on, 246
British Anti-Lewisite, *see* BAL *and* 2:3-Dimercaptopropanol

C

Calcium ions, effect on action of procaine, 251
Centruroides noxius, Hoffmann, action of venom on cholinesterases, 219
Cerebrospinal fluid, effect of injected solutions on cell content of, 80
Choline derivatives, action on isolated rabbit auricles arrested by paludrine, 341

Cholinesterases,
action of venom of a Mexican scorpion on, 219
inhibition by polymethylene bis-onium salts, 301
Conessine,
irritant action of, 326
pharmacology of, 237
Cotton rats, use in experimental filariasis, 285
Courbonia virgata, toxic principle of, 187
Curare-like action of polymethylene bis-onium salts, 298

D

Diamidines as antibacterial agents, 211
Diamino-methylpyrimidines in chemotherapy of tuberculosis, 160
Dihydroxyphenylserine, decarboxylation of, 315
2:3-Dimercaptopropanol, actions of, 84 (*see also* BAL)
Dosage, basis for animals of various weights, 309

E

Emetine, amines formally derived from, in amoebiasis, 49
Eserine, anticurare activity on superior cervical ganglion, 113

F

Filarial infection, maintenance for chemotherapeutic investigations, 285

G

Gastric secretion,
effect of different rates of histamine infusion, 231
inhibition by paludrine, 346, 350, 352
Glucose metabolism,
of *P. gallinaceum*, 1
of *T. evansi*, 8

H

Histamine antagonists, comparison of, 174
Histamine infusions, effect on gastric secretion, 231

I

Impulse counter, a recording, 271
*Iso*conessine,
irritant action of, 326
pharmacology of, 237

L

Lead acetate,
distribution in normal and BAL-treated rabbits, 223
effect of BAL and BAL-glucoside on poisoning by, 137
Litomosoides carinii, maintenance of infections, 285
Liver sympathin, studies on, 189
Local anaesthetics,
effect of injected solutions on cell content of C.S.F., 80
phenylthiourethanes as, 297
Lymphogranuloma venereum, chemotherapeutic action of nitroakridin 3582, 181

M

Metabolism,
of glucose, *see* Glucose
of procaine in the cat, 128
Methyl fluoroacetate, toxicology and pharmacology, 118
Methyl *iso*thiourea, pressor analogues of, 198
Methylpriscol, compared with priscol, 254
Miracil D, toxicology, absorption, and excretion, 167

N

*Neo*antergan, effect on gastric secretion, 231
*Neo*conessine,
irritant action of, 326
pharmacology of, 237
Nitroakridin 3582, chemotherapy of, in virus diseases, 181
Noradrenaline, adrenaline, and liver sympathin, 189
Noradrenaline carboxylic acid, decarboxylation of, 315

P

Paludrine,
action of choline derivatives on rabbit auricles arrested by, 341
activation of, 320
effect on gastric secretion, 346, 350, 352
Penicillin, antibacterial activity of compounds related to, 305
Pharmacology of
conessine, *iso*conessine, and *neo*conessine, 237
methyl fluoroacetate, 118
sulphetrone, 15
Phenylthiourethanes as local anaesthetics, 297
Photostilbamidine, constitution of, 75
Plasmodium gallinaceum, glucose metabolism of, 1
Polymethylene bis-onium salts, curare-like action of, 298
Posterior pituitary extract, modifications of Dale and Laidlaw's method of standardization, 328
Potassium ions, effect on action of procaine, 251
Priscol, change in action on introduction of methyl group, 254
Procaine,
effect of potassium and calcium ions on action of, 251
metabolism in the cat, 128
Promin, compared with streptomycin and sulphetrone, 37
Psittacosis, chemotherapeutic action of nitroakridin 3582, 181

Q

Quinones,
antimitotic action of, 263
sulphydryl addition compounds of, 335

R

Recording impulse counter, 271

S

"Shock," treatment with sodium salt solutions, 72
Sodium salt solutions in treatment of "shock," 72
Standardization of posterior pituitary extract, modification of Dale and Laidlaw's method, 328
Stilbamidine,
  constitution of irradiation product, 75
  instability of, 163
Streptomycin, compared with sulphetrone and promin, 37
Structure and action among anthelminthics, 91
Sulphetrone,
  compared with streptomycin and promin, 37
  in experimental tuberculosis, 29, 37
  pharmacology of, 15
Sulphonamides in chemotherapy of tuberculosis, 153
Sulphones in chemotherapy of tuberculosis, 146
Sulphydryl addition compounds of quinones as antimitotic agents, 335

T

Tetramethylammonium, isolation as salt from *Courbonia virgata*, 187
Toxicity of BAL, effect of environmental temperature on, 116
Toxicology,
  of methyl fluoroacetate, 118
  of miracil D, 167
Trypanocides, effect on glucose metabolism of *T. evansi*, 8
Trypanosoma evansi, glucose metabolism of, 8
Tuberculosis, experimental, treatment with
  antimalarial drugs, 156
  diamino-methylpyrimidines, 160
  sulphetrone, 29
  sulphetrone, streptomycin, and promin, 37
  sulphonamides, 153
  sulphones, 146

V

Venom of a Mexican scorpion, action on cholinesterases, 219

Printed in Great Britain by Fisher, Knight and Co., Ltd., The Gainsborough Press, St. Albans.
